## EDUCATION

**B.Tech - Computer Science with specialization in Artificial Intelligence** 2023 – 2027
Indira Gandhi Delhi Technical University for Women ; **CGPA : 9.5**

**Senior Secondary** 2022 – 2023
Ryan International School, Faridabad ; **92.2%**

**Secondary** 2020 – 2021
Ryan International School, Faridabad ; **92.6%**

## EXPERIENCE

**Adobe - Product Intern** 25/05/2026 – 31/07/2026
Noida
- Built a multi-agent AI pipeline to translate business requirements into implementation-ready engineering tasks using a repository-aware knowledge base.
- Automated ticket-to-deployment workflows across Jira, GitHub, GitHub Copilot, and CI pipelines.
- Developed an analytics dashboard with an AI-driven suggestion engine to improve developer workflows and streamline software development processes.

**AI-powered Full-Stack Development Intern** 01/06/2025 – 31/07/25
IGDTUW
- Built and deployed SafeDrive, a full-stack web application with a backend-connected computer vision model (MobileNetV2), achieving 98%+ accuracy in real-time driver drowsiness detection.

**Python and Machine Learning Intern** 01/06/2024 – 31/07/2024
IGDTUW
- Developed Sahas, a machine learning system for predicting human trafficking in India using Random Forest, achieving 89.29% accuracy through demographic and socio-economic data analysis.

## SKILLS

**Programming Languages**
Java, Python, SQL

**Web Development**
HTML, CSS, JavaScript, Tailwind CSS, React j.s

**Product and Workflow Automation**
Business Requirements Analysis, Workflow Automation, Process Improvement

**AI and Machine Learning**
ML and Deep Learning (ANN, CNN, RNN, LSTM, GRU – basics), LLM/API Integration

**CS Fundamentals**
OS, CN, OOPS, DBMS, Data Structures and Algorithms

**Tools & Technologies**
Jira, Git, GitHub, GitHub Copilot, Jenkins CI, Figma

## PROJECTS

**SafeDrive - Real-Time Driver Drowsiness Detection System** 11/2025 – 01/2026
- Developed a full-stack, real-time driver drowsiness detection application using Python, MobileNetV2, and deep learning, achieving 98%+ accuracy for driver alertness classification.

**DarshanMitr - Smart Pilgrimage Management** 10/2025
- Developed DarshanMitr, a pilgrimage management web app with crowd monitoring, virtual queues, devotee guidance, and emergency SOS features.
- Designed an interactive, user-centric dashboard focused on safety, accessibility, and AI-powered crowd management.

**Sahas - Aims to predict and prevent Human Trafficking in India** 06/2024 – 07/2024
- Developed Sahas, a machine learning system to predict human trafficking in India using demographic and socio-economic data.
- Evaluated Logistic Regression, SVM, and Random Forest models, achieving 89.29% accuracy with Random Forest.

## POSITION OF RESPONSIBILITIES

**PR Lead | PR Team; Amazon Web Services Cloud Club (AWS)** 01/2026 – Present
In this role, I organize events, promote AWS Cloud technologies, and actively engage with members and the broader college community to foster awareness and collaboration.

**Vice President | CodeBenders IGDTUW** 01/2024 – Present
formerly Technical Team Lead (2024–2025), led technical initiatives and organized coding events, workshops, sessions, and bootcamps.

## ACHIEVEMENTS

**Conference Paper Presentation (ICDPN-2025)** 11/2025
Presented research paper *"Sahas – A Novel Approach for Predicting and Preventing Human Trafficking in India"* at the International Conference on Data-Processing and Networking.
